

Supplemental Terms & Conditions Applicable to Streamlined FCC International 214 Authorization Filing Service

Service Description: The Compliance Group (TCG) offers a fixed fee service for processing streamlined FCC International 214 Authorization applications. This service is designed to be straightforward and efficient, ensuring compliance with the FCC's streamlined filing requirements.

Fixed Fee Scope of Work: For agreed upon, low fixed fees, TCG will provide the following services:

1. **Information Request:** TCG will send an information request to the client to gather the necessary data for the streamlined 214 application.
2. **Assessment of Information:** Upon receiving the client's responses, TCG will assess whether the information meets the criteria for a streamlined filing. If the information provided does not clearly confirm eligibility for streamlined processing, TCG will notify the client of potential concerns that the FCC may require a more detailed review.
3. **Consultation Referral:** If there are indications that the application may not qualify for streamlined processing, TCG will inform the client that the scope of TCG's service is limited to filing streamlined applications. Clients with complex cases or those potentially requiring detailed scrutiny by the FCC will be advised to consult with legal counsel. TCG will refer the client to the associated law firm for in-depth consultation and handling. It is important to note that legal consultation fees are not included in the fixed fee and will be billed separately by the law firm.
4. **Client Responsibility and Waiver:** If the client opts not to consult with legal counsel, TCG will proceed with filing the application as provided by the client. Clients are responsible for the accuracy and completeness of the information submitted. TCG's role is to facilitate the filing based on the client's information. Any issues arising post-submission, including additional FCC scrutiny or requests for information, will fall outside the scope of TCG's fixed fee service. These issues will need to be addressed by the client directly or through engagement with legal counsel.

Limitation of Service:

- The fixed fee service is limited to the preparation and filing of streamlined FCC International 214 Authorization applications.
- Any additional work, including but not limited to detailed FCC communications, non-streamlined filings, or legal advisory services, will require a separate engagement and fee arrangement with TCG or the associated law firm.

Acknowledgment: By engaging TCG for the FCC International 214 Authorization filing service, the client acknowledges the scope of the fixed fee service and understands that any services outside of this scope will incur additional charges and may require legal counsel.
